

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A resin sheet comprising a gas barrier layer, a base layer, and two hard coat layers respectively as the outermost layers, wherein:

one of the hard coat layers has recesses and protrusions on the outer surface thereof;

~~and~~ at least one of the hard coat layers contains transparent particles[[],];

~~wherein~~ the surface having recesses and protrusions has a surface roughness of from 80 to 500 nm;

the gas barrier layer has a thickness of 2 to 10 μm ;

the hard coat layer having recesses and protrusions has a peak-to-valley distance of from 20 to 80 μm ;

the transparent particles have a particle diameter of from 0.5 to 30 μm ; and

the hard coat layer containing transparent particles comprises from 1 to 50 vol% of the transparent particles, based on the total volume of the hard coat layer.

2. (currently amended): A resin sheet comprising a gas barrier layer, a base layer, and one hard coat layer as an outermost layer, wherein:

the hard coat layer has recesses and protrusions on the outer surface thereof and contains transparent particles;

the gas barrier layer has a thickness of 2 to 10 μm ;

the hard coat layer has a peak-to-valley distance of from 20 to 80 μm ;

the transparent particles have a particle diameter of from 0.5 to 30 μm ; and

RULE 116 AMENDMENT
U.S. Appln. No. 10/002,300

the hard coat layer comprises from 1 to 50 vol% of the transparent particles, based on the total volume of the hard coat layer.

3-4. (canceled).

5. (original): The resin sheet of claim 1, wherein the transparent particles are spherical particles, the difference in refractive index between the spherical particles and the matrix resin constituting the hard coat layer being from 0.03 to 0.10.

6. (original): The resin sheet of claim 1, wherein the base layer comprises an epoxy resin.

7. (original): The resin sheet of claim 1, wherein the hard coat layers comprise a urethane resin.

8. (withdrawn): A process for producing the resin sheet of claim 1 which includes the step of transferring the shape of recesses formed in a support to thereby form recesses and protrusions on a surface of a hard coat layer.

9. (original): A liquid crystal display which uses the resin sheet of claim 1.

10-22. (canceled).

23. (original): An organic electroluminescent display which uses the resin sheet of claim 1.

24-31. (canceled).
